

CHATWANE

FRP Series

Fiber Glass Farm Fans

Product Description

- ❖ High air performance; Energy-efficient & extremely low noise level; direct drive and a very stable connection between hub and blades for easy maintenance. Fan body is made of high-quality FRP that preventing corrosion. The blades have passed balance test, stable performance, big volume, and low noise.
- ❖ Parallel flow theory made PVC shutters, can stop the flies, and prevent the air flow back.
- ❖ High performance low speed motor, good quality, long life time.
- ❖ The fan is widely used in poultry and industry, to exhaust NH₃, H₂S waste air and damp air, exhaust hot air, smoke, dust, etc.

Technical parameters

Model	Diameter	Voltage	Frequency	Blade Speed	Power	Air Flow	Dimension
	mm / Inches	V	Hz	rpm	w	m ³ /h	mm X mm X mm
FRP-24	630(24")	380	50/60	930	370	12,600	850 X 850 X 500
FRP-36	920(36")	380	50/60	560	550	24,000	1060 X 1060 X 550
FRP-50	1270(50")	380	50/60	560	1100	45,500	1460 X 1460 X 600
