

CHATWANE

SQF Series

Exhaust Fans

Product Description

- ❖ Thickened cast steel blade : Advanced spraying process ,keep clean and long time ,anti oil pollution and temperature resistance
- ❖ The structural parts made of high quality steel sheet by punching . Good rigidity ,light weight ,beautiful and easy to in stall . Large air volume ,low noise , smooth running ,safe and reliable .
- ❖ The motor adopts cold-rolled silicon steel sheet ,copper wire ,less than 50K temperature rise design ,with excellent overload capacity The motor uses high quality low noise ball bearing and built-in re-settable thermal protector to ensure stable operation and long service life .

Technical parameters

Model	Diameter	Speed	Power	Noise	Volume	Dimensions	Weight
	mm / Inches	rpm	W	dB	m3/min	mm	kg
SQF-30	300(12")	1400	50	70	18	350 X 350	4
SQF-40	400 (16")	1400	180	70	48	480 X 480	8

Application

- ❖ It is widely used in industrial and mining enterprises, warehouses, shopping malls, entertainment places and so on to achieve heat prevention, ventilation and ventilation, and improve the environment.
- ❖ Also applicable in tunnel, underground passage and subways, etc.
- ❖ Carpark basement, Elevators or lifts etc.
